**Characteristics of UFLS Regional Reliability Standards**

1. There are several approved NERC standards that contain errors that have been identified as errata. If you disagree with this determination, please identify the specific standard that includes the errata, and the material impact of not accepting the error as errata.

Yes - I do agree that the noted errors in the reliability standards are correctly identified as errata.

No - I do not agree that the noted errors in the reliability standards are correctly identified as errata.

Comments: Also note the following discrepancies:

EOP-002-2, under Version History, version 1, the date may be wrong, "September 19, 2008" (?), this may be a type-o, possibly should read "2006".

EOP-004-1, under Version History, version 1, under Action, the form (OE-411) that is referenced is not contained in the Standard; Possible a type-o, possibly should read "Form OE 417".
